DHIA COWS ESTABLISH ANOTHER ALL-TIME PRODUCTION RECORD

DHIA cows do it again--establish another all-time high average production level.

In 1957, DHIA cows on the average produced 9,894 pounds of milk and 389 pounds of butterfat.

Establishing new all-time high records is an old story with DHIA herds as shown in the following table.

Year	Cows on test (Number)	Average production	
		Milk (Pounds)	Butterfat (Pounds)
1906	239	5,300	215
1910	<u>1</u> / 25,000	<u>1</u> / 5,730	<u>1</u> / 227
1920	203,472	6,175	247
1930	507,549	7,642	303
1940	676,141	8,133	331
1950	1,088,872	9,172	370
1955	1,333,866	9,502	375
1956	1,406,306	9,713	383
1957	1,479,799	9,894	389

1/ Estimated.

DHIA members are using their DHIA records to guide them in their culling, feeding, selection and herd management practices to improve their dairy herds.

What DHIA members do any dairyman can do. Any dairyman can improve his herd regardless of its size or level of production if he keeps records on his cows and herd and if he uses those records to improve his culling, feeding, selection and herd management practices.

The National Cooperative Dairy Herd Improvement Program offers to dairymen three recordkeeping plans. These plans are the Standard DHIA, the Owner-Sampler, and the Weigh-a-Day-a-Month. One of these plans will suit the needs of any dairyman in the country and every dairyman not now keeping records on his cows and herd (and 9 out of 10 are not) should be urged to enroll his herd in one of these recordkeeping plans.

SUMMARY OF THE 1956-57 DAIRY-HERD-IMPROVEMENT-ASSOCIATION RECORDS, BY STATES

State	Assoc- iations active 1-1-57 (Number)	Average production				State	Assoc- iations active 1-1-57 (Number)	Average production

1/ Changed testing year from calendar to fiscal year.

DHIA PROVED-SIRE RECORDS TABULATED IN JULY 1958

Following is a list of 214 sires whose records were tabulated or retabulated by the Animal Husbandry Research Division in July 1958. Production records used in proving DHIA sires consist of 305-day lactation records standardized to a mature equivalent twice-a-day milking basis.

An asterisk at the end of a sire's registration number indicates a retabulated record. The asterisk may be followed by any number from 1 through 15 (i. e. , *12) to indicate in which of the 15 printed lists his previous record appeared. Or the asterisk may be followed by the month and year (i. e. , *May 51) of the DHIA letter in which his previous record appeared. Two asterisks following the sire's registration number, or following reference to a previous listing, indicate that the proved-sire tabulation or retabulation was requested by one of the States.

In case records from more than one herd were used, the reference is to the herd from which production records for the largest number of the sire's youngest daughters were reported. If the sire has been used in an artificial-breeding association, the name of the association is given.

Proved-sire records consisting of fewer than 10 comparisons are indicated as "preliminary proofs" because these records may be significantly changed when additional comparisons become available and are included in the proved-sire records.

Proved-sire records consisting of fewer than 25 comparisons with daughters resulting from artificial breeding are indicated as "preliminary AB proofs" because these records may be significantly changed when additional comparisons become available and are included in the proved-sire records.

To make the most intelligent selection of a sire, the dairyman should use these proved-sire records to single out the most promising sire and then make every effort to supplement these data with additional information gathered from the herds in which the dams and daughters made their records. Particular attention should be given to the feeding practices and environmental conditions under which the records were made, in order to be assured that the records of the daughters were not made under more favorable conditions than those of the dams or vice versa. It is especially important to determine that there has been no selection of daughters in making the comparison.
